

# 6/25/2024 Log

---

## Summary

---

- Today I shifted my focus on creating a message encryptor in rust
- I am able to encrypt a message using the system time as a seed.
- I am now going to write a decryption script.
- I am having to learn more programming concepts to make my code more efficient.
- I was forced to learn some of the features of rust since this program became much more difficult.
