6/4/2024 Log

Summary

- Today I foucsed on the Cyber CTF challenge. I spent more time going through the switch statement but I was not able to find any thing of significance.

- I spent time trying to review any blanks in my assembly knowledge.

- I am starting to think I need to learn more about fibers and threads.

- The rest of the day was spent trying to study fibers and threads and how I can analyze them within the executable.
