6/11/2024 Log

Summary

- Today I continued my work on presto.

- I went in and analyzed more of the assembly to make it make more sense.

- I am still stuck on getting the first function. I have ideas for what it does but I need to get passed this first.

- I noticed a call to rcx. I wonder if this is a way of hiding certain functions or capabilities.

- I am also looking into creating the best structure but I am not sure if I will still have to deal with the rcx call first.

- Overall this challenge is very dificult for me but I have been learning a good amount so far.
